This section shows you each State where the vehicle has been titled, when it was titled, the odometer reading on the date of title, etc. There is good information here to protect you from fraud. Keep an eye out for the odometer readings. If the current odometer reading is less than it was in one of these title records, you might suspect a fraud tactic called "Odometer Rollback." To obtain more details on this VIN in the state please click the applicable state link from the "State of Title".

Damage, Safety & Other Title Brands

Source: NMVTIS

A title brand is an official record of damage or other information about a vehicle that could affect its value or the ability to operate it safely. For example, a "rebuilt" title brand means the vehicle has suffered enough damage to be declared a total loss by an insurance company and then was rebuilt. A title brand remains on record for the life of the vehicle. This section gives you a summary view of the total number of "Brands" associated with this VIN since its first record of sale. If this section shows any hits, a description of the brand will be listed alongside the name of the brand and the date in which it was branded.

Reference of all possible title concerns: Collision | Dismantled | Fire damage | Flood damage | Gray Market | Hail damage | Junk | Owner Retained | Salt water damage | Salvage Retention | Salvage--Damage or Not | Specified | Totaled | Vandalism | Crushed | Disclosed Damage | Gray Market | Junk Automobile | Manufacturer Buy Back | Parts Only | Pending Junk Automobile | Prior Non-Repairable / Repaired | Prior Owner Retained | Rectify Previous Exceeds | Mechanical Limits Brand | Salvage--Reasons Other Than Damage or Stolen | VIN replaced by a new state assigned VIN | Kit | Rebuilt | econstructed | Refurbished | Remanufactured | Replica | Reserved | Vehicle Contains Reissued VIN | Warranty Return | Exceeds Mechanical | Limits | Memorandum Copy | Vehicle Safety Defect Corrected | Vehicle Safety Defect Uncorrected | Vehicle Non-conformity Corrected | Vehicle Non-conformity Uncorrected

Recall Information

Source: NHTSA

This section contains information from National Highway Traffic Safety Administration Vehicle Safety. To find out if your vehicle still has open recalls that require repair, VINSmart recommends contacting an authorized dealer for more information.

Recall No.	17V647000	Report Receipt Date	10/12/2017
Component(s)	Service Brakes, Hydraulic	View More Recall(s)	
Summary	Polaris industries, inc. (polaris) is recalling certain 2010-2017 victory cross country, cross country tour, cross roads, magnum, and hard ball motorcycles. If the engine misfires, continued riding may result in heat from the catalytic converter melting the rear brake line and nearby wiring.		
Consequence	A melted rear brake line can reduce braking performance, increasing the risk of a crash.		
Remedy	Polaris will notify owners, and dealers will re-route the brake line away from the exhaust catalyst, free of charge. The recall began on november 8, 2017. Owners may contact polaris customer service at 1-877-737-7172. Polaris' number for this recall is v-17-02.		
Notes	Owners may also contact the national highway traffic safety administration vehicle safety hotline at 1-888-327-4236 (tty 1-800-424-9153), or go to www.safercar.gov.

Consumer Access Product Disclaimer

The National Motor Vehicle Title Information System (NMVTIS) is an electronic system that contains information on certain automobiles titled in the United States. NMVTIS is intended to serve as a reliable source of title and brand history for automobiles, but it does not contain detailed information regarding a vehicle's repair history.

All states, insurance companies, and junk and salvage yards are required by federal law to regularly report information to NMVTIS. However, NMVTIS does not contain information on all motor vehicles in the United States because some states are not yet providing their vehicle data to the system. Currently, the data provided to NMVTIS by states is provided in a variety of time frames; while some states report and update NMVTIS data in "real-time" (as title transactions occur), other states send updates less frequently, such as once every 24 hours or within a period of days.

Information on previous, significant vehicle damage may not be included in the system if the vehicle was never determined by an insurance company (or other appropriate entity) to be a "total loss" or branded by a state titling agency. Conversely, an insurance carrier may be required to report a "total loss" even if the vehicle's titling-state has not determined the vehicle to be "salvage" or "junk."

A vehicle history report is NOT a substitute for an independent vehicle inspection. Before making a decision to purchase a vehicle, consumers are **strongly encouraged to also obtain an independent vehicle inspection** to ensure the vehicle does not have hidden damage. The Approved NMVTIS Data Providers (look for the NMVTIS logo) can include vehicle condition data from sources other than NMVTIS.

NMVTIS data **INCLUDES** (as available by those entities required to report to the System):

- Information from participating state motor vehicle titling agencies.
- Information on automobiles, buses, trucks, motorcycles, recreational vehicles, motor homes, and tractors. NMVTIS may not currently include commercial vehicles if those vehicles are not included in a state's primary database for title records (in some states, those vehicles are managed by a separate state agency), although these records may be added at a later time.
- Information on "brands" applied to vehicles provided by participating state motor vehicle titling agencies. Brand types and definitions vary by state, but may provide useful information about the condition or prior use of the vehicle.
- Most recent odometer reading in the state's title record.
- Information from insurance companies, and auto recyclers, including junk and salvage yards, that is required by law to be reported to the system, beginning March 31, 2009. This information will include if the vehicle was determined to be a "total loss" by an insurance carrier.
- Information from junk and salvage yards receiving a "cash for clunker" vehicle traded-in under the Consumer Assistance to Recycle and Save Act of 2009 (CARS) Program.

Consumers are advised to visit www.vehiclehistory.gov for details on how to interpret the information in the system and understand the meaning of various labels applied to vehicles by the participating state motor vehicle titling agencies.

VINSmart prepares its vehicle history and title reports based on data from government sources and independent agencies, including NMVTIS. VINSmart relies on its data sources for the accuracy and reliability of the information provided in its reports. VINSmart neither enters nor validates the data from its sources, and does not guarantee the accuracy or completeness of the data provided. Therefore, no responsibility is assumed by VINSmart or its agents for errors or omissions in this report. VINSmart further expressly disclaims all warranties, express or implied, including any implied warranties of merchantability or fitness for a particular purpose.
